If you are not connected to a public sewer and instead rely on a private sewage disposal system to remove waste from your home, you'll want to read on so you can properly protect your plumbing system. You can cause great harm to your home, your family and even the environment if you're not familiar with the proper use and maintenance of your private sewage disposal system.

 $\label{eq:continuous_continuous$

Private sewage disposal systems, sometimes referred to as onsite wastewater treatment and disposal systems, are typically underground treatment structures, commonly used in rural areas without centralized sewer systems. They use a combination of nature and proven technologies to treat wastewater from household plumbing produced by bathrooms, kitchen drains and laundry.

The 2021 IPSDC provides requirements for inspection of private sewage disposal systems and addresses the best practices and technologies to ensure the safety and welfare of communities, individuals and businesses that utilize their own on-site wastewater solutions.

The IPSDC has been adopted in 20 states, Puerto Rico and Guam. Approximately 182 million people, or 54% of the U.S. population, live in areas that have adopted the $\mathcal{F}I: 9\$J^{\tilde{I}} \mathcal{F}I: 9\tilde{J}^{\tilde{I}} ddel VVI["[V]dj"[V]J[WdZ^kbboYehf]bVV[Z^mj^j^["ej^[h"]14 International Codes"1%9eZ[i *Ž$$

You can read more about the IPSDC by visiting here.
