

With over 30 years of experience, Doug Hatch has been a Test Developer / Program Manager for the International Code Council and is responsible for test development and the validation of inspector and contractor exams. He currently leads the test development team, coordinates the examination development and advisory committees, implements validity reviews, maintains exams in compliance with approved testing standards and conducts job task analysis and standard setting research.

Doug has also spent 12 years with hands-on experience as a Master and Journeyman Electrician, foreman, and electrical contractor. He worked as a licensed Journeyman and Master Electrician for various electrical contractors on a wide variety of jobs on a residential, commercial, and industrial capacity. He also established and owned his own electrical contracting company, Hatch Electric.

Doug has held certifications with the Code Council and IAEI, holds an Associate of Applied Science Electricity and has participated in hands on professional development training on the electrical codes and completed graduate work in testing, psychometrics and statistics. He has also worked as a full-time secondary public school teacher of Spanish and History.
