

ICC Off-Site Construction Mechanical Electrical and Plumbing Standard Consensus Committee (IS-OSMEP)

The second public teleconference meeting of the ICC Off-Site and Modular Construction Standards Committee will be held on January 19, 2022 remotely via WebEx. Meetings will be held on Wednesdays in three-week intervals until further notice.

Next meetings: February 9, 2022, March 2, 2022, March 23, 2022.....

- MEETING NOTICE -

**Teleconference Meeting
Wednesday, January 19, 2022, 2:00 pm - 4:00pm CT**

The purpose for this meeting is for the IS-OSMEP committee to consider:

- Scoping statements for existing work groups.
- Additional work groups if needed.
- Construction of the initial draft of the standard.

An agenda will be posted on the [IS-OSMC website](#) prior to each meeting.

This meeting is open to the public.

If you plan on attending, please contact Karl Aittaniemi, Committee Secretariat for call in information. Agendas, meeting minutes, meeting materials and all other documents can be found on the [IS-OSMC website](#).

The scope of the IS-OSMEP committee is to develop an American National Standard ICC/MBI 1210-202X Standard for Mechanical, Electrical, Plumbing Systems, Energy Efficiency and Water Conservation in Off-site Construction. ICC/MBI 1210-202X would address requirements for the energy efficiency and water conservation of off-site construction projects and the planning, designing, fabricating, transporting, and assembling, of commercial and residential building MEP system elements. This includes the componentization and modularization of elements of MEP systems, the incorporation of MEP systems in componentized, panelized or modularized building elements, and the achievement of energy efficiency and water conservation requirements in off-site construction. This standard will not apply to HUD manufactured housing.
